

I have not forgotten that the public owns the airwaves. The FCC ought to demand far better broadcasting from television and radio stations that actually serves to enhance democracy and political thought.

I expect more from the FCC than what they currently demand of our nation's TV and radio stations.

I believe Sinclair Broadcasting's plan to air an anti-Kerry documentary before the election is a blatant form of bias by that company.

We deserve more localism and diversity on our airwaves. Please make our broadcasters do more to renew their licenses than send in a postcard.

Thank you,
Jason Barbose
